---

## Work Experience

---

### **Junior Web Developer**, *Government of Ontario (Sept 2017 – Dec 2017)*

- Gained proficiency with Angular 2+ through working on frontend structures for two new systems and created workflow for projects implementing Angular 2+ best practices
- Effectively learned and used Azure, VSTS, Angular 2+, .Net Core 2, and NoSql to quickly develop user interface, and anticipate and react to UX needs
- Collaborated with one large and one small team to implement one of three projects and complete the entire frontend for another project

---

## Personal Projects

---

### **Accounting Learning Resources**, *May 2017 – July 2017* - <http://elsegrechcpa.com/>

- Collaborated with a Ryerson professor to create a website, coded with Laravel and Vue.js
- Gained experience with developing backend to allow her to easily update course material

### **Task Management Website**, *December 2017-present*

- Created with Angular, C# and SQL Server; inspired by Trello and its task management boards
- Allows users to create projects, send invitations, add and move around tasks

### **Weather App**, *April 2018* - [Weather app](#)

- Created using jQuery mobile, intended for mobile use and weather tracking
- Displays hourly and daily current weather for any city; updates information every three hours

---

## Education

---

### **Software Development and Network Engineering Coop Program**

*Sheridan College, Oakville, ON (2015 to present, Graduation: Dec 2018) – GPA: 3.84*

---

## Interests

---

- Adventuring outdoors through bicycling, canoeing, and hiking
